OUR NETWORK

Today we welcome our clients

Close. Closer than you expect.

SOLIDITY OF THE BPER GROUP

To gain your trust, we intend to demonstrate our reliability: our bank is among the best in the national banking system.

VERY SOUND CAPITAL STRUCTURE

Our CET1 is much higher than the minimum the ECB sets for us, and is higher than that of most Italian retail banks. This indicator reflects the benefits of the ECB's validation of internal approaches for assessing credit risk.

BPER Banca was the first bank in Italy to take this important step within the framework of the Single Supervisory Mechanism.

HIGH LIQUIDITY

The levels of our liquidity ratios are higher than the minimums required by regulations. We also have significant capacity to access the refinancing granted by the ECB to keep our liquidity levels high.

LOW RISK

LEVERAGE is the ratio used to assess a bank's risk profile.

Our risk profile is one of the lowest in the national banking system.
