

PRODUCT ADVANTAGES

Natural texture high definition at reduced costs compared to natural products.

Wide variety shape and structure features based on particular chromatic variations

Preventing the formation moisture, resistance to fire, weather and gelivity

By adding pumice stone or expanded clay reduction of weight

Easy to install

WET CASTING VORTEX HYDRA

AUTOMATION OF PRODUCTION SYSTEMS
FOR **TOP QUALITY STONE** VENEER PRODUCTS

SELF STACKING CARRIER SYSTEM

From a **capacity** range of
200, 500 and 1,000 sq.m
per shift

High demand for cladding of residences, hotels,
restaurants, providing architects and interior designer
new creative opportunities!

TECHNOLOGY FOR
CONCRETE PRODUCTS

ADVANTAGES

Possibility to operate also with existing moulds

Operates with extensive range of moulds

High quality product finishing including perfect squaring of corners

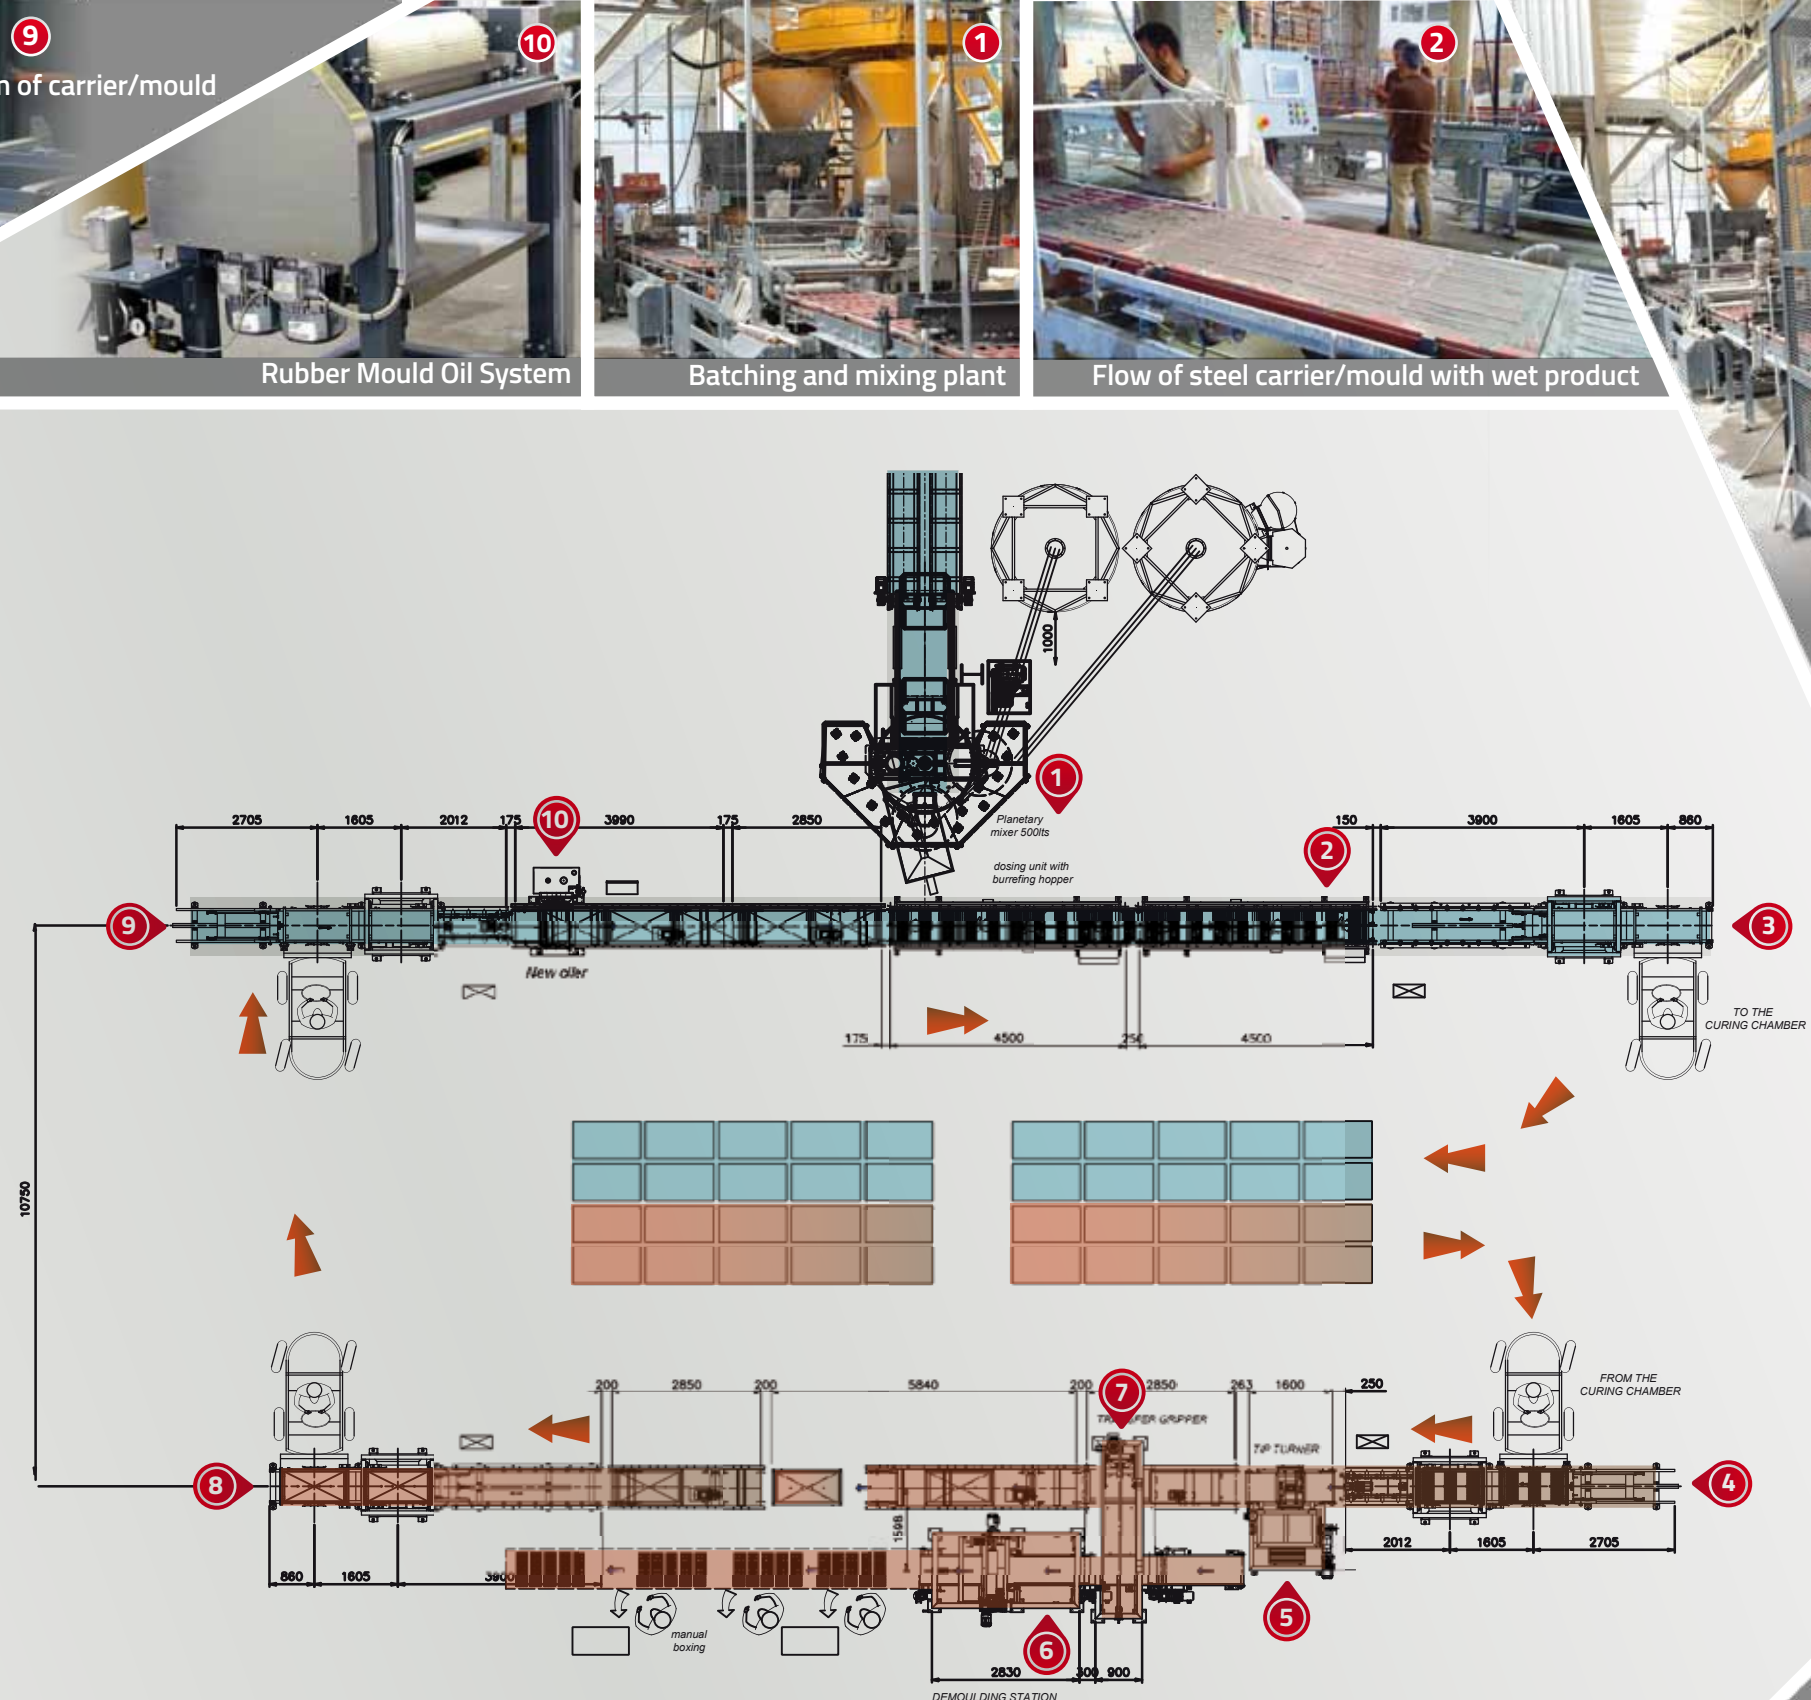

Self-stacking trays optimize the product curing and storage process

Automatic demoulding process with minimization of labour costs, inefficiencies, stone rejects and maximum of durability of the rubber footprint, high production capacity

Modular design enables full automation to be phase

Phased investment

Short term payback

Loader System of carrier/mould

8

Transfer System of rubber mould over steel carrier

7

Brush Demoulding System

6

Tip Turner System

5

Unloader System of carrier/mould with dry product

4

Wet line and Steel Carrier Loader

3

Batching and mixing plant

1

Flow of steel carrier/mould with wet product

2

Rubber Mould Oil System

10

Unloader System of carrier/mould

9
