

cablotech[®]

We create wiring harnesses.
We build electrical panels.
We assemble your ideas.

cablotech.com

Cablotech experience, Made in Italy quality.

Cablotech is an Italian company specialising in custom solutions for all your wiring needs, including electronic and electromechanical products and semifinished products. Backed by over 25 years of experience working with electrical panels, wiring and assemblies, we supply our customers around the world with large and small custom solutions, providing results that always exceed expectations.

A company founded on ideas, people and customer focus.

We offer a comprehensive service that starts with the definition of the technical specifications, continues through every stage of the creation process, and ends with final testing.

We give our customers the support they need to ensure the success of their projects. As a reliable partner, our growth is built on lasting relationships with our customers, suppliers and partners.

Industrial solutions.

We operate in various industrial sectors to ensure our customers' success. The experience we have accumulated over the years allows us to thoroughly evaluate each problem in order to suggest the best solutions and create market-leading products.

Quality.

Cablotech's commitment to quality goes above and beyond the main quality management protocols. We have decided to raise our standards with regard to any non-compliant products, bringing the resolution rate to 100% in recent years.

We create pre-assembled wiring harnesses using state-of-the-art technology for all types of industrial applications.

For over 25 years, Cablotech has been meeting all your wiring needs, offering reliable and innovative solutions for signal cables, ribbon cables and power cables.

We are able to offer a comprehensive service that spans every phase of each project, from design to final testing, ensuring optimal order management and quality control. Created to suit different sectors and types of equipment, our wiring harnesses are widely recognised for their high level of customisation.

We oversee every stage of production, wiring and final testing to ensure the best possible results for our electrical panels.

Honed over many years, our expertise in the production of electrical panels allows us to meet even the most specific requests, from co-design projects to complete on-machine wiring.

We use the best materials and components on the market, entrusting the creation and testing of each product to a dedicated team of specialised technicians in order to offer our customers the best possible prices and guaranteed quality. The key to the success of our electrical panels lies in our assembly skills and high level of attention to detail.

Industrial electronic assemblies.
We provide comprehensive and tailored
services for each project and sector.

Cablotech has a dedicated department specialising in electromechanical assemblies, backed by more than twenty years of experience and in-depth knowledge, from wiring to electronic and mechanical components, and from product testing to shipping.

Our assembly services include subassemblies with electrical components, as well as mechanical and hydropneumatic subassemblies for finished products or semifinished products on behalf of third parties.

We assemble electronic modules and carry out rigorous oscilloscope, multimeter and rigidity tests..

We are responsible for every step: cable processing, wiring, construction of the necessary electrical panels, creating electromechanical or electro-pneumatic assemblies, in-depth product testing, logistics management, and shipping to the final destination.
