CMS

More than 45 years
of precision mechanics

Since 1975 C.M.S. S.p.A. has been working in mechanical engineering with the aim of providing high quality products, thanks to specific skills and expertise.

Starting from the drawing of the customer, we manage all the phases of the project, quickly and efficiently.

We produce and supply mechanical parts, groups and complete automatic machines. We operate with the "Build-to-Print" logic, according to our customer's technical specifications.

Certifications

We produce mechanical and industrial components as well as complete machines for third parties, with the highest international standards and certifications.

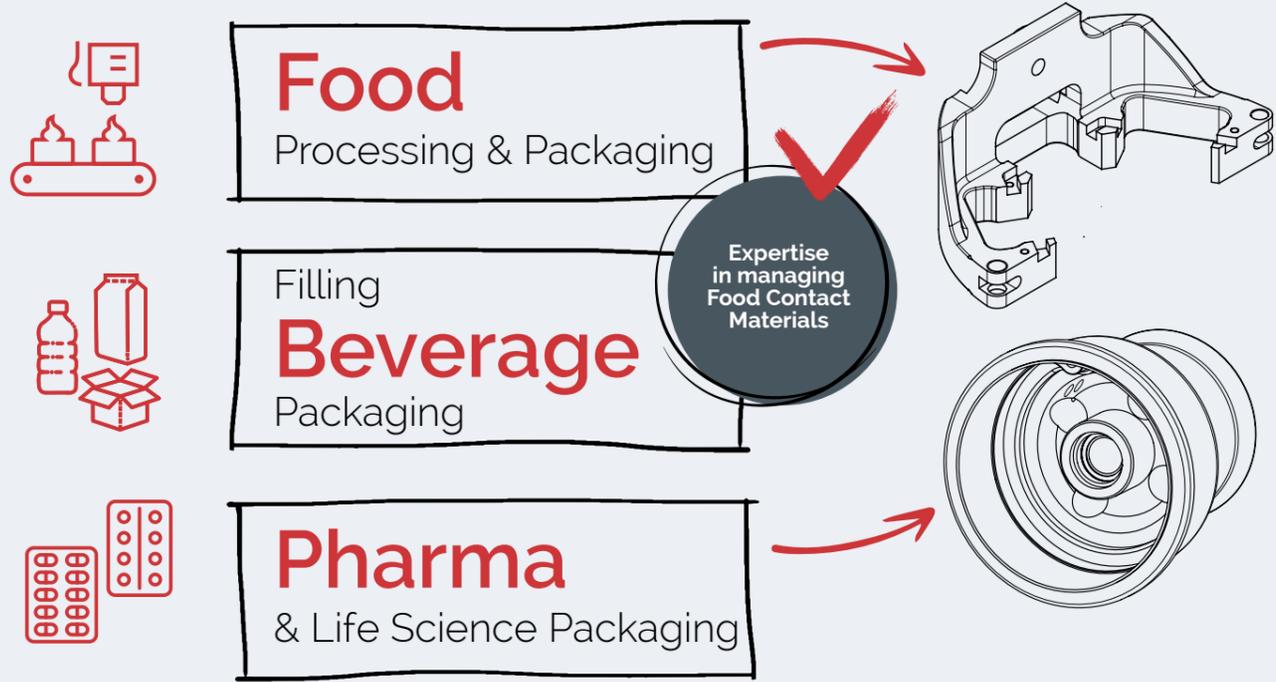

Better factory, better life

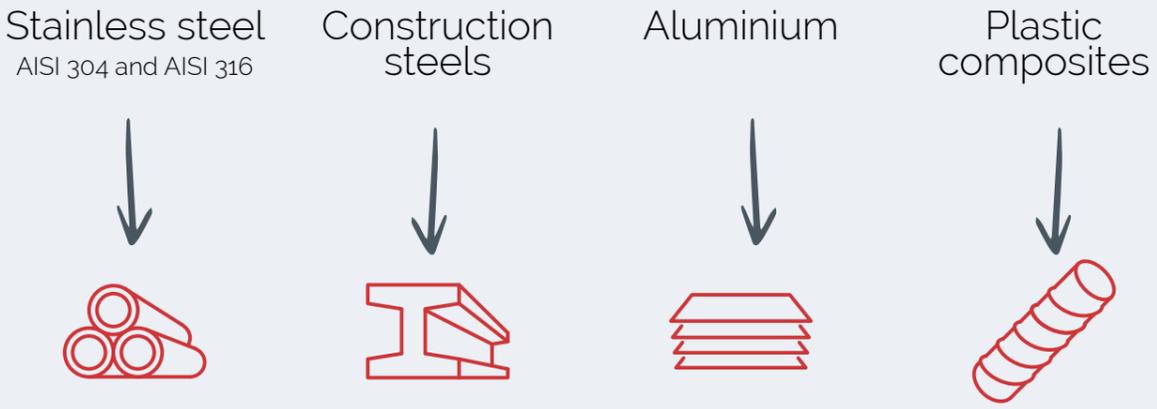

We set the ambitious goal of improving the quality of life of our collaborators, with activities that develop their skills, nurture their talents and contribute to their work-life balance.

- Company nursery
- Training
- Flexible working times
- School-work alternation
- Family Day

Main sectors

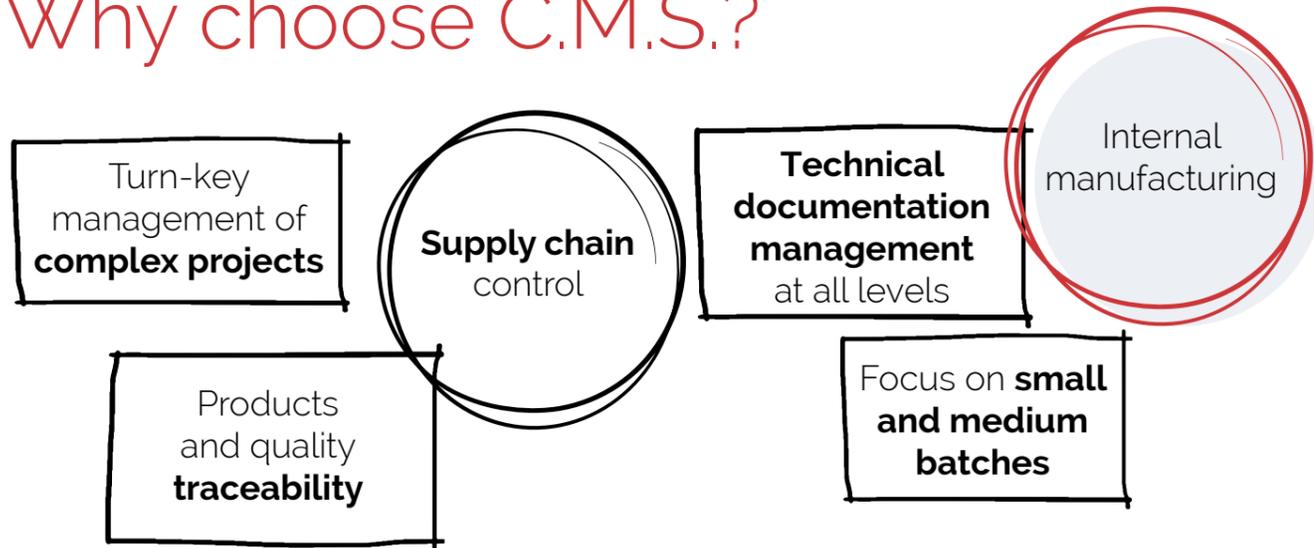

Our main materials

Choosing C.M.S' services give you the advantage of interfacing with a single partner who can put forward many years of experience in different industrial sectors with various production technologies, verticalizing complex and specialized supply chains on its platform.

Why choose C.M.S.?

Our technologies

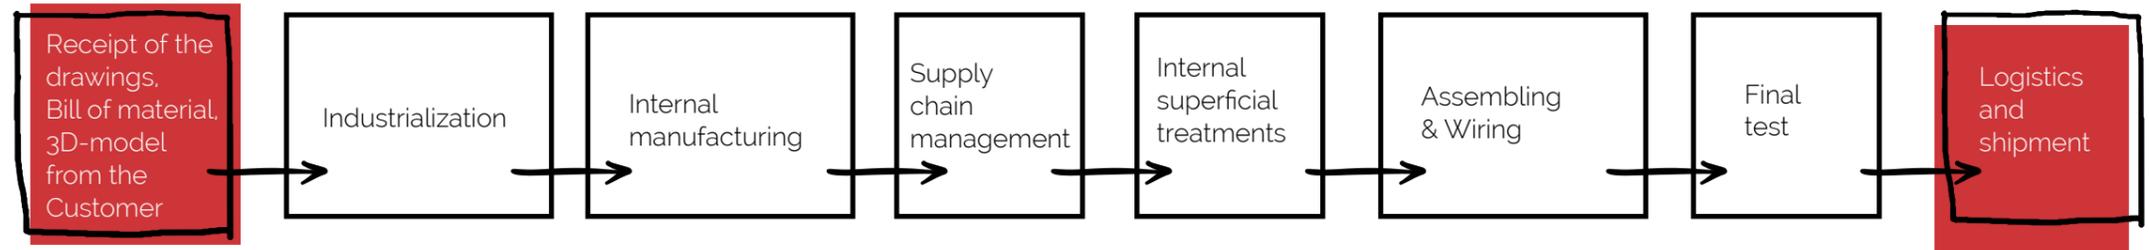

Raw material management
 Metal sheet processing
 Pipes bending
 Tig mig welding
 Robotic welding
 Robotic deburring island
 Turning
 N/C milling

Machining centers
 Surface finishing
 Laser marking
 Metrology room
 Assembly
 Test
