The measure increasing the value of the Auditorium della Tecnica, promoted at the end of 2015 and ended in the first half of 2016, revives a prestigious space, reinterpreted and reintroduced into the range of quality architectural features of the modern city.

The auditorium is provided with a large foyer with big hallways, a huge conference room with 800 fixed seatings, interesting for its spatial structure and the internal design that, along with a 9 meters long speakers table, 18 rooms of the top floor, simultaneous interpreting booths, control rooms, spaces for exhibitions and food courts, represents one of the most important congress centers in Rome.

# FOYER

The large foyer, which can be accessed from the main building of the Congress Center, is a versatile space, capable of hosting service areas such as hospitality and accredited areas, cloakroom, cafeteria and temporary exhibitions. Under the banner of modernity and flexibility of use, it is perfect for entertaining the participants during breaks.

# EXHIBITION AREAS

Adjacent to the Auditorium, the two exhibition rooms of 1.200 square meters offer a multi-purpose space ideal for hosting events such as exhibitions, conferences, company presentations, team building activities and exclusive advertising operations. They are also suitable for coffee breaks, business lunches, cocktails.

# MEETING ROOMS

In addition to the Auditorium and the exhibition areas, the Congress Center offers a diversified and flexible structure of meeting rooms with the entrance in Viale dell'Astronomia 30. The rooms configuration allows different ways of using them and a seating capacity for 20 to 250, thanks also to the movable partitions use, in order to meet any demand.

# CAPOGROSSI TERRACE

**Capogrossi Terrace** located on the top floor of Confindustria has a breathtaking view with 2.230 square meters of versatility and elegance.

Designed by the artist **Giuseppe Capogrossi**, it is one of the most evocative location in the Eur district, thanks to the immense and open spaces that face to Palazzo della Civiltà Italiana and the Basilica of San Pietro and Paolo.

The spaces that can be modeled, according to the needs, with design furnishings and light effects thus enhances the concept of style and elegance.
