

FURLOG

One company, infinite solutions

Furlog is a Multimodal Transport Operator specialized in solutions on demand for rail, air and sea, logistics, national and international. For small or big enterprises, short and long distances, Furlog has the solution for you.

RAIL TRANSPORT

Furlog is able to transport using traditional wagons, allowing for a great degree of optimization of the loading thanks to the combination of different type of goods. Moreover, Furlog offers intermodal transport utilizing containers, tanks or swap bodies, with customizable solutions road/rail.

ROAD TRANSPORT

Rail transport services are assisted by road transports with daily departures for full and partial loads, handling of urgent deliveries and seasonal peaks. The result is the optimization of the transport, with consequent economic advantages without sacrificing efficiency.

AIR AND SEA TRANSPORT

Furlog offers international transport via air and sea, both import and export.

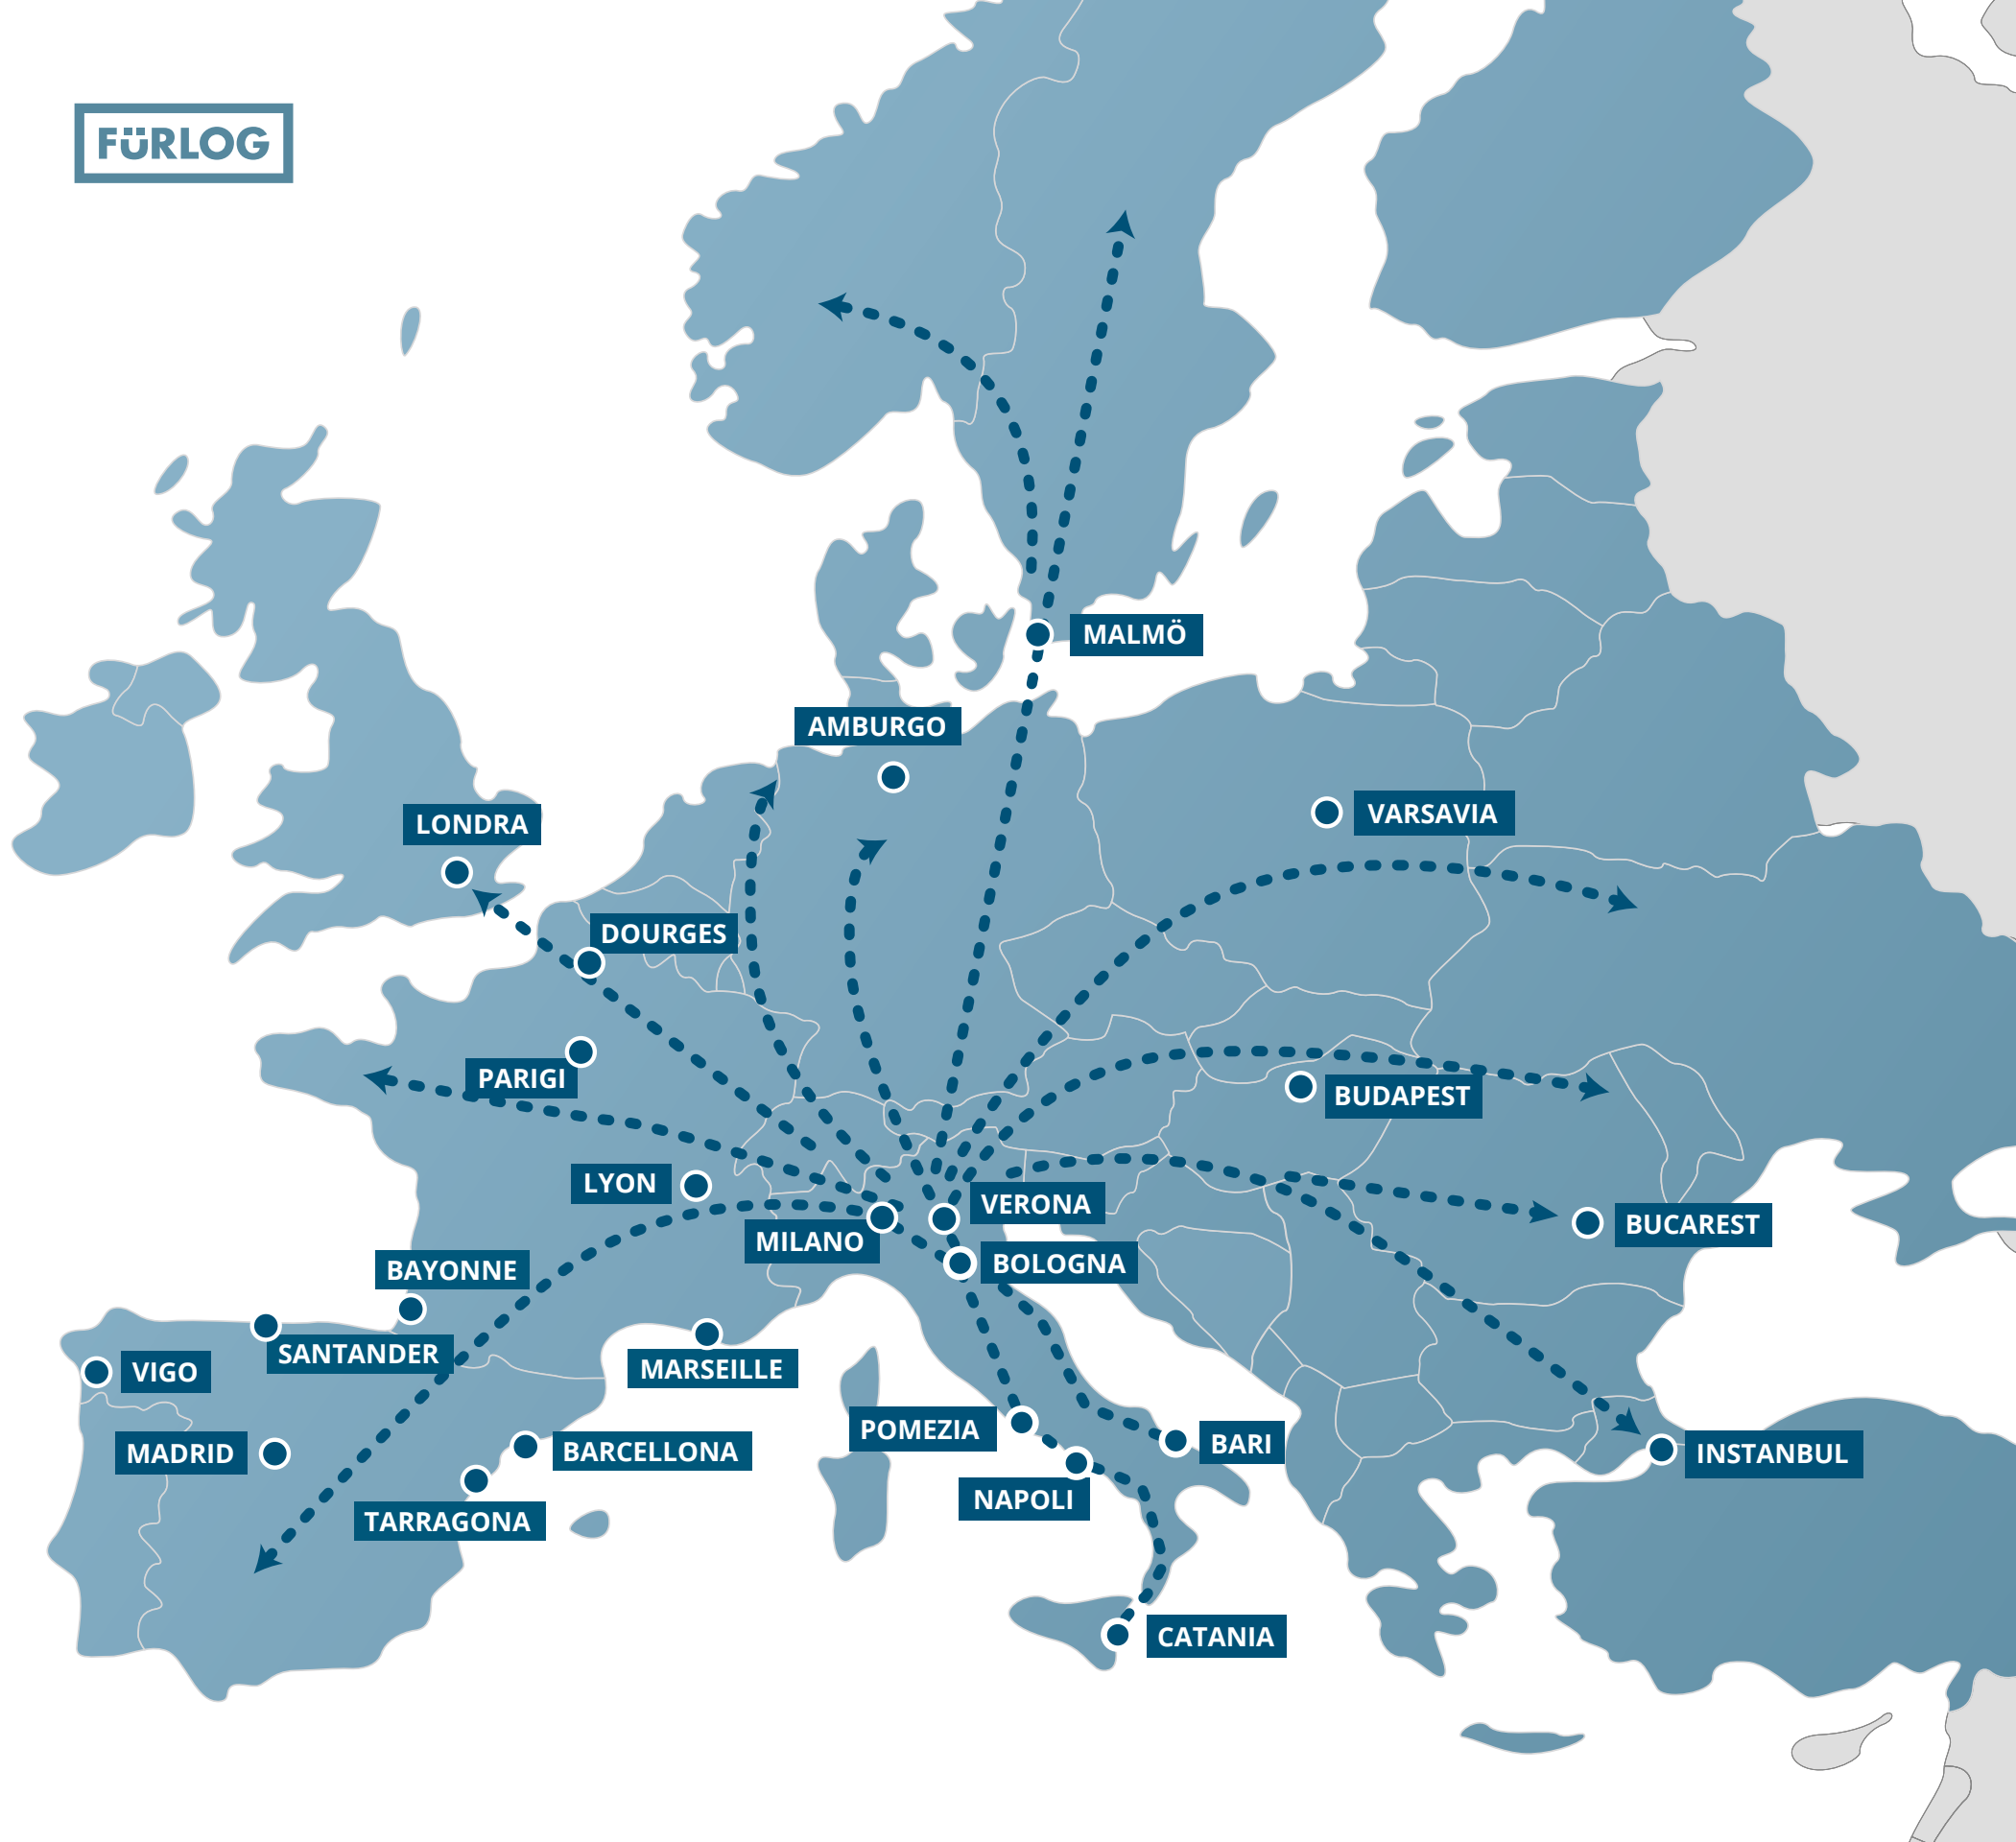

Using our expert partners in the field with a consolidated experience.

Furlog can offer specialized and customizable solutions, including door to door services, logistic and distribution.

LOGISTIC

Furlog can satisfy your logistic need for warehousing, with direct handling of the goods in transit.
It offers handling and storage for containers and swap bodies.
We are ready to receive your requests, also for the development of special packaging and technologically advanced.

DOOR OPENING HEIGHT	2,280 mm	2,280 mm	2,585 mm
CUBIC CAPACITY	33,13 m ²	67,63 m ²	76,35 m ²

GREEN VISION

Attention to the environment is one of our priorities, evidenced by our commitment to the development of intermodal and rail transport.

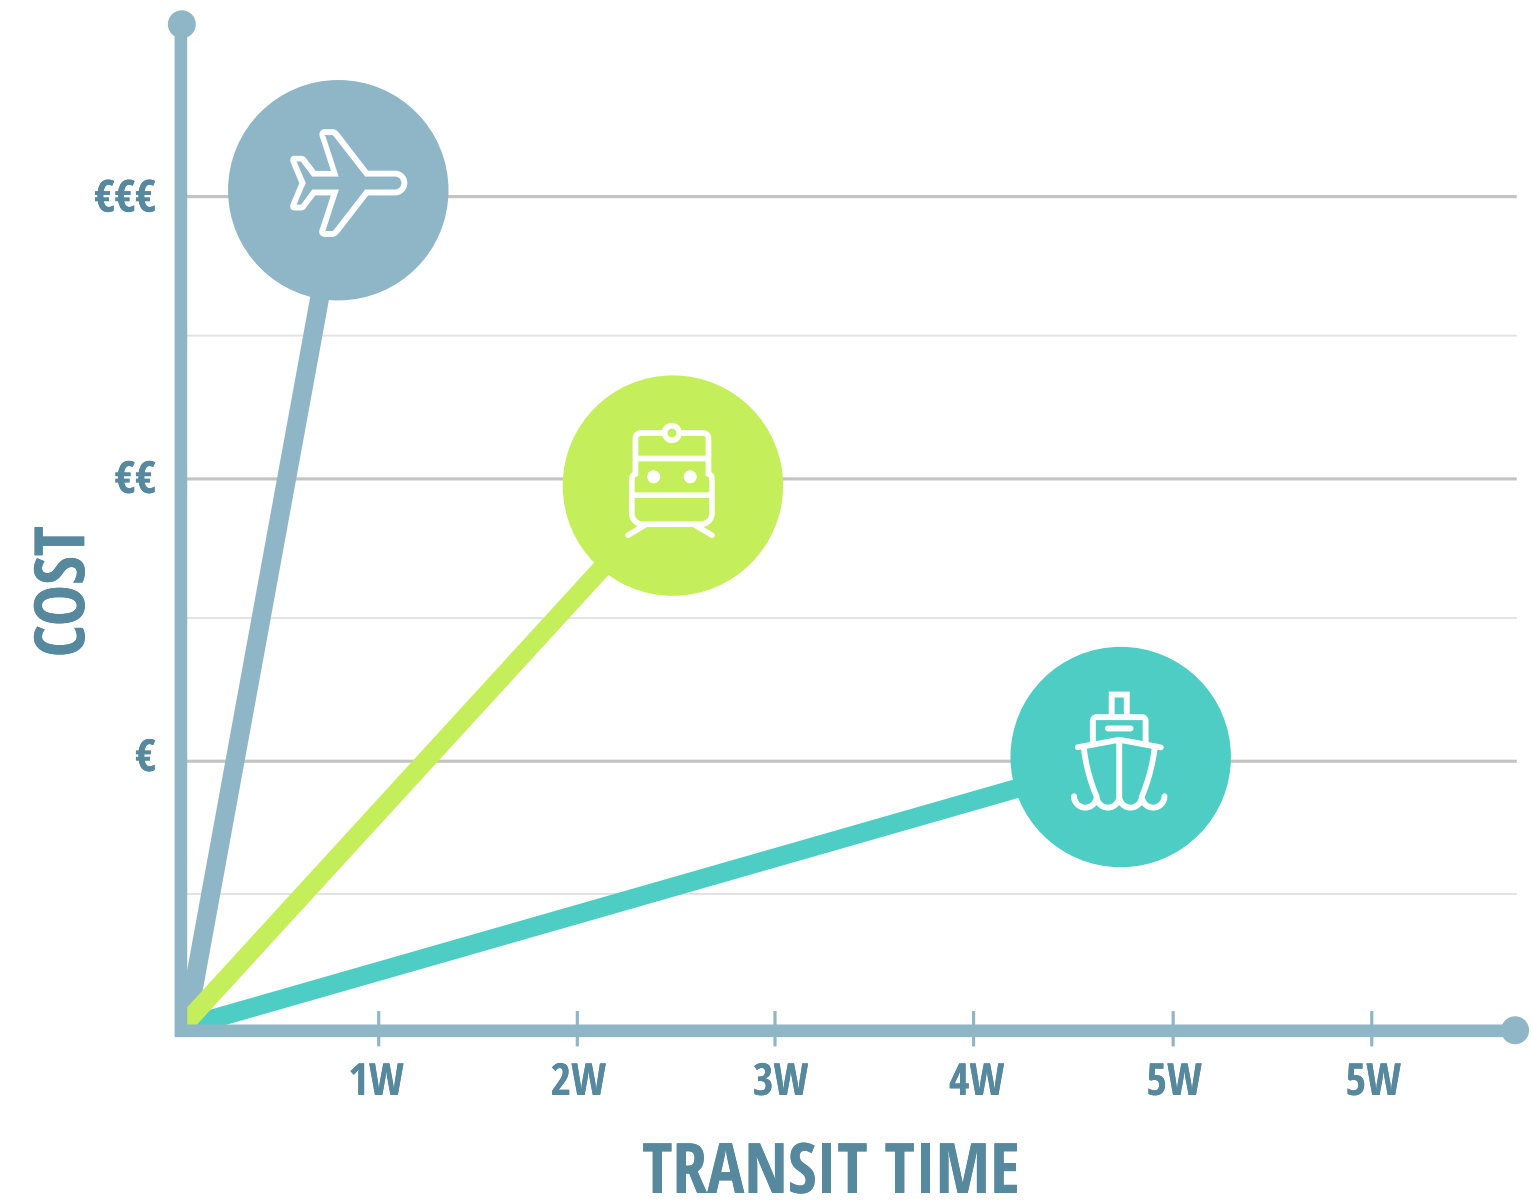

Our aim is to provide an alternative to the most invasive transport solutions for the environment: by analyzing the **Milan-Suzhou** section, for example, we can see that the **CO2 emissions** produced by rail transport are much lower than the emissions generated by transport on the road and specially by air.

COMPARISON BETWEEN THE WAY OF TRANSPORT

In the long distances the railway transport is the perfect compromise between efficiency of the service and optimization of the costs.

Taking as example the route **Milan-Suzhou** we notice that the rail transport guarantees shorter transit times in comparison to sea solutions at much lower rates than air transport. Whichever is your business field, our railway services will suit you.

CUSTOMER CARE

Proposing as unique partner, Furlog offers **assistance** and **complete service** from the beginning to the destination, all over the world, including rail, road, sea and air transport and additional value added services.

YOUR FREIGHT & LOGISTIC SOLUTION
