

Your AI.
Your Data.
Your Control.

**Secure.
Customizable.
Always under control.**

Private inference.

Run Knowledge processing on your infrastructure, ensuring that data always remains in a secure and controlled environment.

Safe interactions.

From anywhere, with proven protocols and immediate asynchronous interactions via email – ideal for high-performance executives.

Evolving assistants.

Empower your employees. Increase productivity with knowledgeable assistants who learn and adapt.

Tailor: Secure, on-premise private AI.

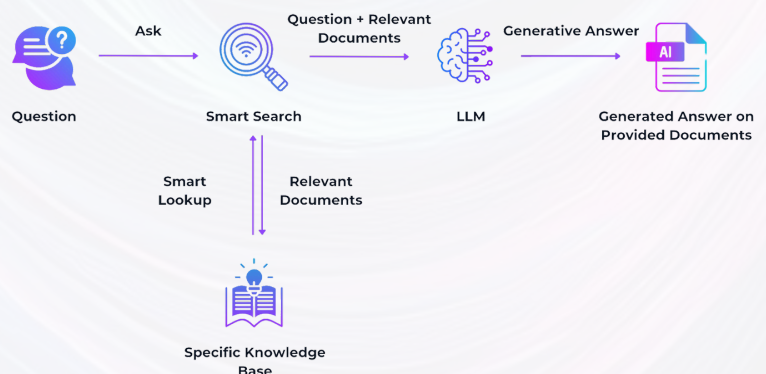

Discover Tailor — the on-premise, enterprise-grade AI that redefines security, privacy, and efficiency. Unlike other AI tools that expose your data to third-party risks, Tailor ensures your sensitive information stays 100% in-house.

MagiDoc

Interactive environment for hierarchical, complex document generation (regulatory compliance, reporting, procurement, tender management)

Talk to your documents privately.

Unlock the valuable knowledge hidden in static enterprise data repositories and put it to work. Our patented Knowledge Transformer Architecture (KTA) and advanced Enterprise-grade Hybrid Retrieval-Augmented Generation (RAG) are powerful tools that enable knowledge mining from enterprise data lakes. Advanced data management interfaces enable selective access for users, assistants, and automated processes. Years of enterprise experience become easily accessible for a competitive advantage.

Your AI.
Your Data.
Your Control.

Your private AI assistants.

Experience the next generation of AI-powered assistance.

Intelligent.

Responsive.

Designed to improve your workflow.
