■ About Us

Gruppo Sistema was founded in 1996, through the union of four companies which had been operating in the IT sector since the beginning of the 80s. Each company had different skills and aims, both of a technical nature and regarding their reference markets.

The qualifying element which led the four companies to join forces and enabled the establishment of a company currently employing a staff of over 80 and which operates all over Italy, is at the basis of the entrepreneurial project which has supported and driven the company's activity for twenty years, namely pursuing the vocation of a company which produces value for its clients.

Specialisation in a number of vertical markets, the ability to manage complex projects, technological and organisational skills, combined with excellent operating efficiency, guarantee a long-lasting, reliable partnership for companies which choose Gruppo Sistema services and products.

■ Our approach to Information Technology

Sharing our clients' strategies and aims is the basis for our commitment to developing IT projects. Painstaking attention to organisational impact, training and start-up are other specific components involved in planning projects developed by Gruppo Sistema.

Our Mission

- ⑥ Understanding Information Technology as an incentive for the competitive development of clients' companies, developing top technological and organisational skills.
- ⑥ Considering our Human Resources as the engine of a continuous renewal process, setting professionalism, skills, enthusiasm, a positive working relationship and involvement in the aims of the company as essential principles.
- ⑥ Constructing a comprehensive range of products and services which offers clients knowledge, support and solutions guaranteeing a high value and competitive advantage.
- ⑥ Pursuing the aim of profit, expanding in size and improving quality, conditions for the continuity of the company over the years, respecting values of uprightness and ethics.
- ⑥ Being an important factor in the economic and social fabric of those areas in which the company operates.

■ Gruppo Sistema and Dygroup

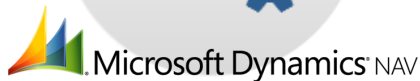

Gruppo Sistema, along with 10 other Italian companies, is the founder of Dygroup. This reality has developed over Dynamics projects to date, involving 350 collaborators and 300 NAV Dynamics consultants, a team of certified specialists able to create value for client companies.

Dygroup appointed to the **President's Club for Microsoft Dynamics 2013**

and is **Gold Partner Microsoft**

Where: [Avellino](#) - [Bergamo](#) - [Bologna](#) - [Cento](#) - [Cesena](#) - [Firenze](#) - [Lissone](#) - [Padova](#) - [Roma](#) - [Torino](#) - [Udine](#) - [Vicenza](#) - [Vigevano](#)

■ The core business generates value with a full range of products and services

We carry out projects ERP with **Microsoft Dynamics NAV** technology, to increase productivity and facilitate the adoption of small and medium enterprises in a changing world.

We help companies manage the entire decision-making process with the toolkit **BOARD**, from data collection and analysis of information, from setting goals to decisions, the operational control of the results achieved.

Projects put on the customer, the associate, the citizen with **Microsoft Dynamics CRM**. A solution of rapid deployment, easy to use with features specific to the main needs of departments including sales, marketing and customer service.

■ Products portfolio integrated with Microsoft Dynamics NAV to meet every need of our customers

E-Commerce module for Microsoft Dynamics NAV, enables companies to manage transactions of e-business, directly in Microsoft Dynamics NAV.

Gruppo Sistema is the only **Italian Implementation Partner**.

The suite **Kartha** includes solutions for the dematerialisation of tax documents, management of digital signatures and biometric automatic extraction of data from vendor invoices.

The EDI flows of all companies.

With collaborative projects based on **Microsoft SharePoint**, you can centralize all activities of business collaboration. Distribute, share information, streamline document management are the avenues available for businesses to reduce costs and improve productivity.

■ Project

Our team is composed of Advisors Application, Process and Senior Systems Engineers who have consolidated many years of experience not only in technological fields, but through relationships with managers of clients belonging to different Industries, have also reached managerial and organizational skills.

We operate not only in the creation and implementation of the project but also covering all the needs that may occur after the go-live.

■ Partnership

We work with leading manufacturers cleanse them of Information Technology. The most important investments of the Group System are designed to improve the skills of their staff through a continuous update. Certifications and business cases are made demonstration of our ability to choose, propose and implement solutions developed.
